

Grace Fellowship Church Innovative Welcome Center Signage

Grace Fellowship Church

Grace Fellowship Church is a multi-site church founded by five families in 1994. With strong weekly attendance, local and international mission work, educational programs and resources, Grace Fellowship Church is a supportive community gathering space.

ASI Cincinnati has worked directly with Greater Cincinnati's Grace Fellowship Church over the course of two neighborhood location renovations through bidding with the client's General Contractor. When Grace Fellowship Church wanted to update the signage at their main campus in Florence, KY, the organization came directly to ASI Cincinnati.

The unique project called for a special solution - eye-catching signage to draw attention to Grace Fellowship Church's new Welcome Center.

Service Offerings

- Consultation
- Design-Build
- Fabrication
- Installation

Product Applications

- Perforated Metal
- Perimeter LED Illumination
- Dimensional Letters & Logo

About the Solution

Grace Fellowship Church discussed their concept for a highly visible sign with ASI during the initial consultation. The idea was to implement a sign large enough to greet parishioners and guests from three sides. With this in mind, the natural solution was to implement a sign that was either circular or semi-circular.

When considering illumination, ASI's Sales Consultant recommended perimeter LED illumination. Discussing the design and layout, ASI designed the perforated background to add interest and the large dimensional lettering and central logo.

Grace Fellowship Church is a very forward-thinking organization, so they saw the value in investing in this creative design. Now, the innovative, custom-designed sign greets church parishioners and visitors each week.
