## Slim, Innovative Frame with Panel Inserts

ASI's Fascia is a range of signs that, when used together with the Venus system, constitute a total interior signage solution. The range consists primarily of smaller signs that are used as wall mounted identity signs, cubicle signs, desk and table signs and projecting signs and as part of a donor recognition wall or system within a facility. Fascia has a slim-line frame created by an innovative production process. The frame is a holder for acrylic panels or panels made from any material. The panels are secured to the frame back by magnets. Fascia, being a flat system can be paired with the Venus system to facilitate the larger signs and result in a total sign solution.

Some facts about Fascia:

- Flat face sign with a very modern and clean appearance
- Aluminum frame 0.275" deep with gently rounded corners
- Aluminum frame available standard in white, natural anodized and gray
- Frame hold standard acrylic panels 0.078" deep
- Panels secured to frame by means of magnets
- Suction cup supplied to remove panels from frame
- Panels may have a vertical or horizontal orientation within the same frame allowing for a "Mondrian" effect
- Signs can be supplied with a note bar, table or desk stands, In-Use sliders, projecting mounts, and cubicle attachments
- Multiple graphics options include digital print, print on panel, paper insert, ADA using photopolymer and Raster™ Braillle

Sustainable Innovations

The flexibility of the Fascia design promotes sustainability. Fascia frames are made from a sustainable and recyclable resource that are recyclable at end-of-life.
