Truly Lockable Insert Sign
"No Tools Required"

Puzzle™ is the only truly lockable paper insert sign that requires no keys or hardware for locking.
Puzzle is a complete sign family featuring wall and door mounted solutions, suspended signs, projecting signs and can be mounted to monoliths to create a unique solution.

- Secret locking system that requires no tools or key. System uses Jigsaw ABS components to facilitate sideways and upwards unlocking motion.
- Inhouse™ updatable paper insert window panels available in a wide range of foil finishes, including metallic series, frosted series, natural series and pastel series.
- Aluminum components on monoliths, projecting and suspended signs available in any color selected from the Standard Finishes Grid panels: computer generated perforated printed inserts via Microsoft® Word® templates.
- Window lens available in clear or green tinted acrylic.
- Texting techniques: Grade II Raster™ Braille, and Grade II Braille produced by Direct Jet UV 3D printer, ulta-graved text, heat bonded vinyl text, direct digital printing and ceramic text.
- ISO 9001 1nd 14001 manufacturing process
- Perforated paper available for inserts.

Sustainable Innovations

The Puzzle™ signage system is a durable, modular solution, which ensures that the system can be easily updated.

Modular Signage Solutions
